

SHAIKH ARSALAN

Full Stack Web Developer | Data Engineering Enthusiast

shaikhmohammadarsalan5@gmail.com | github.com/Arsalan-Dev-Cloud

PROFESSIONAL SUMMARY

MCA student and developer building modern web applications with React, TypeScript, Python, SQL and database technologies. Hands-on experience creating multi-page responsive interfaces, authentication systems, real-time data applications and analytics-oriented projects. Actively developing skills across full-stack web development and data engineering.

TECHNICAL SKILLS

Frontend	React, TypeScript, JavaScript, HTML5, CSS3, Vite, Responsive UI
Backend / Programming	Python, Node.js, Express.js, REST APIs
Databases	MongoDB, PostgreSQL, MySQL
Data / Tools	SQL, Power BI, PySpark fundamentals, Git, GitHub, VS Code, XAMPP

SELECTED PROJECTS

CryptoTradeX - Real-Time Cryptocurrency Platform

[React](#) / [JavaScript](#) / [Node.js](#) / [Express](#) / [MongoDB](#) / [Binance APIs](#)

Built a real-time crypto platform with 200+ coin listings, search, pagination, multi-currency support, authentication, user dashboard, live WebSocket pricing and historical chart data.

Vehicle Health Monitoring & Analytics System

[Python](#) / [OBD-II](#) / [SQL](#) / [Power BI](#)

Designed a vehicle diagnostics and analytics concept using ELM327 OBD-II data such as RPM, speed, coolant temperature, battery values and fault codes, with storage and dashboard reporting.

React Tech Store

[React](#) / [Vite](#) / [React Router](#) / [CSS](#)

Developed a responsive e-commerce frontend with reusable components, product filtering, category selection, cart-count state, product pages and multi-page routing.

EDUCATION

Master of Computer Applications (MCA) - SRTMUN, Nanded

Currently pursuing

Bachelor of Science (Computer Science) - Completed

Three-year degree

CURRENT LEARNING FOCUS

Full-stack web development with React + TypeScript frontend and Python-oriented backend development; Data Engineering with Python, SQL, Spark/PySpark and cloud-oriented workflows.
